ABOUT ME

I am a motivated person, recently graduated from Software Testing Academy, seeking to transition from a career in the gas station industry to an entry-level Quality Assurance Engineer position. During my training as a tester I developed a solid understanding of various testing techniques. I have hands-on experience in both manual and automated testing, creating test cases, execution test scripts, and logging and tracking software defects. Passionate about learning new technologies and eager to start my career in an organization where I can apply my skills and continue to learn and grow.

SKILLS

- Experience with manual and automated testing tools such as Selenium, Web Driver, NuGet, JMetes, Appium, REST API, Postman, C#
- Scrum Methodologies
- Writing Tests
- Defect / bug reporting
- Knowledge of database management systems and SQL queries

EXPERIENCE

Pucko Petrol, Skopje- *Sales Worker*
SEP 2014 - PRESENT

- Customer service and communication.
- Create invoices.

PROJECTS

- [Coin-Tracker](#) (Manual Testing)- This was my final project at the end of the Software Testing Academy. My role is to test flows, find and document bugs and possible improvements . CoinTracker is an application for tracking your monthly income as well as tracking your monthly expenses with the possibility of setting budget limits.
  I have been testing full application, create and document Test Cases as well as Bug reports specification following user stories and requirements.
  The goal was to gain experience and be more confident with my manual testing skills.
  [view-source](#) [view-demo](#)

- [Cargodom](#) (Automation Testing)- After I got confident enough with manual testing, I proceed with learning Automation using Selenium Web Driver. Cargodom is a web application that is mainly used for communication between clients and transporters. My role was to write and run Test Cases in C# using Selenium WebDriver, NUnit tools for unit-testing, and WaitHelpers which helped me to pause test execution for a certain length of time before moving onto another step.
  For control versioning tool i have been using GitHub

EDUCATION

High School 'Gjorce Petrov', Kriva Palanka - North Macedonia
2005 - 2009

Ss.Cyril and Methodius University in Skopje, Iustinianus Primus Faculty of Law
2009- present

BRAINSTER, Skopje - North Macedonia - *Software Testing Academy*
OCT 2022 - MAY 2023
- Selenium Web Driver
- Postman API.
- SQL

- JMeter
- Kiwi

Marinela Krstevska's
module achievement

Completed
**Performance
Testing
(JMeter)**

Configuring proxy servers, modifying API requests (CSRF tokens,
assertions), using Listeners to generate, calculate and showcase
testing results in various visual representations, and finally,
drawing a conclusion from the testing results.

Marinela Krstevska's
module achievement

Completed
**Testing with
Rest APIs**

Data-driven preparation and automation of a test runner with JSON Path
expressions, JSON and Javascript - sending requests to Swagger,
setting an environment in Postman, pre-request scripts and tests.

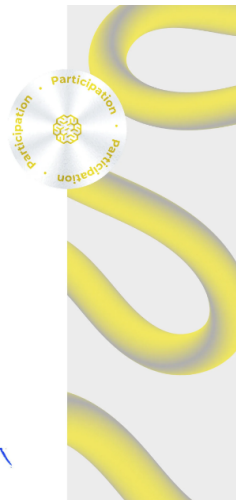

Issued: 15.01.2023

This is to certify that

Marinela Krstevska

has actively participated in
QA Hackathon (Manual Testing) - StreetARTist

and demonstrated a high level of engagement, effective team work and self-initiative
during the Hackathon organized by Brainster. By working on this project, the student
also had the opportunity to develop new skills and competencies and confirm their
acquired knowledge.
